

Sienna Solar Center at a Glance

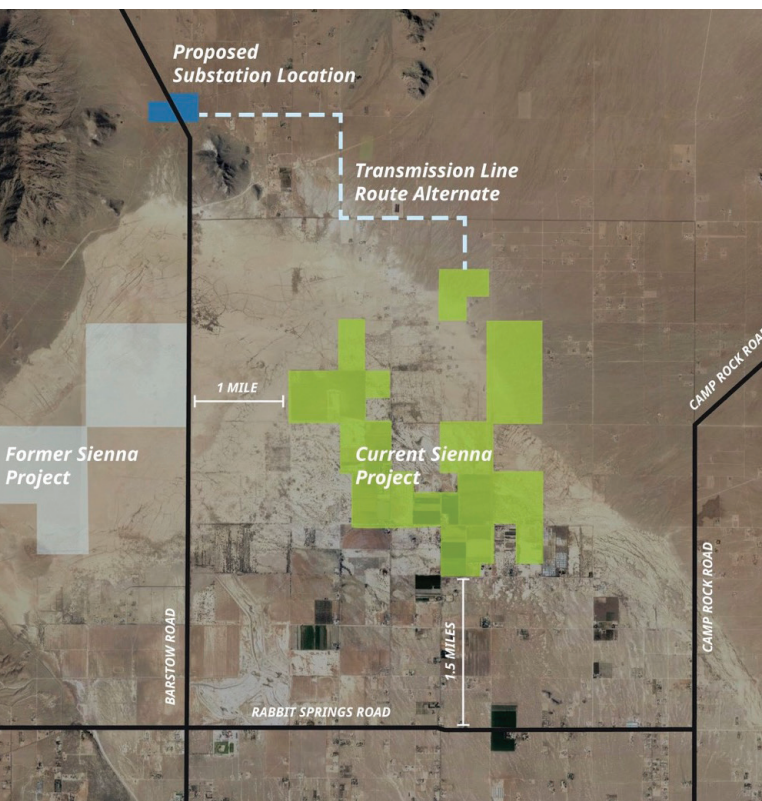

Affordable, clean energy to power over 250,000 California homes

Project Snapshot

Sienna Solar Center is a proposed solar project under development that would feature a photovoltaic solar array (no mirrors) and battery system. Over the course of its lifetime, Sienna Solar Center is expected to generate millions in local tax revenue that can go towards an array of services like schools, public safety, and street services.

In addition, the project would create up to 500 well-paying construction jobs, largely from union labor agreements, and 15 permanent jobs for operations positions in Lucerne Valley. Additionally, indirect benefits from construction would likely spread to local restaurants, markets, and more.

Proposed Location

Local Community Benefits

Avantus Clean Energy prides itself on being a good neighbor, and we want to ensure Lucerne Valley benefits from nearby projects. Local organizations and events we continue to support include:

- Lucerne Valley Roadrunners
- Lucerne Valley Senior Center
- The Children's Fund
- Down-Home Hoedown
- And more to come!

We want to hear from you. We want to support Lucerne Valley in ways that align with the priorities and values of community members. To share suggestions on where to donate, please reach out to sienna@avantus.com.

Focused on Site Safety

The Sienna Solar site will have 24/7 security in place, ensuring a secure and safe site in and around the solar array. The increased security could also result in reduced illegal trash dumping, vandalism, and other nearby illegal activity.

Visit www.SiennaSolarCenter.com for more information on the project, FAQs and before-and-after images of what the project would look like from different view-points in the Lucerne Valley area.
